

Introducing A **BONEGUARD**® Innovation

ARM SLING SHIRT

Innovative Injury Care with Style

INDICATION

For support and immobilization for injuries and sprains to upper extremity

For elevating the forearm and preventing excessive swelling following injuries.

Use for sprained shoulder, injured elbow, wrist and hand sprains, and support of casts and splints.

For use after arthroscopic surgery.

BENEFITS

Excessive weight on neck is avoided.
Abrasion of the skin is avoided.

Better elevation of the forearm is achieved as it is held closer to body when compared to regular arm-sling.

Side zipper allows for easy access.

Loose fit allows wear over other clothing.

Can be worn as a regular shirt after recovery from injury.

ORDERING

Please complete form on reverse.
